Gifts That Make a Difference

Who doesn't love the joy of gift-giving? It's a way to show you care—whether it's for your family, friends, colleagues or customers. Surprising someone with a special gift can truly make a difference in their work or personal life. It has the power to make them feel valued, appreciated, loved or welcomed. The magic of selecting the perfect gift and witnessing the recipient's response is an experience like no other. But gift-giving holds a greater significance beyond the sheer pleasure it brings.

By choosing your gifts wisely, you can also make a difference for our planet. It's an opportunity to demonstrate your concern for the world we live in and the fragile planet we call home. With just one Earth, we must take better care of it. Every purchase we make has an environmental impact—there's no escaping that reality. However, by opting for gifts with a lower ecological footprint, you can join our collective efforts to reduce carbon emissions and create a positive effect.

Are you ready to make a difference? Wonderful!
Enjoy browsing through our catalogue and remember that the gift you choose will not only impact a single individual but also contribute to a better world for all.

The scope

The CO₂ Footprint scope is cradle-to-grave. This LCA approach covers the GHG-emissions generated by a product throughout its entire life cycle; from the extraction of raw materials to the end-of-life treatment or disposal.

CO₂ 0.49kg.

P329.671
RCS standard recycled plastic
TWS earbuds

The 5 phases of the Life Cycle Assessment

Product ID	Total KG CO ₂ per piece					
		Materials & Production	Packaging	Transportation	Energy Use & Electronics	End of life
P329.671	0.49 KG	53 g	5 g	25 g	372 g	29 g
	100%	11,08%	1,08%	5,25%	76,49%	6,10%

*This LCA approach covers all GHG-emissions generated by a product throughout its entire life-cycle; from the extraction of raw materials to the end-of-life treatment/disposal. The calculations are done with a carbon footprint (CFP) calculation tool. The methodology is in conformity with the principles of ISO 14067:2018, verified and critically reviewed, in compliance with ISO 14071:2014, by Bureau Veritas. The generated carbon footprint is subject to change based on new information, research and data sets.

Our CO₂ footprint

Transparent CO₂ footprint per product

Make a memorable giftbox. It's easy.

Start designing

Craft your very own custom gift box from scratch. Choose your favourite colours, choose a design that resonates with your style, and embark on the journey of creating a true work of art. Rest assured, our wide array of box sizes ensures a flawless fit for your specially chosen gifts. To ignite your imagination, we present a thoughtfully curated collection of four gift box ideas, showcased in our catalogue.

Unisex & all year round collection

Fully traceable & block chain verification by AWARE™

Each product has a digital product passport

2% donation to Water.org

Fully traceable & block chain verification by AWARE™

How can you be sure that the sustainability claims we make are trustable? We aim to avoid greenwashing and prove that final products are made from sustainable materials. Therefore we teamed up with Aware™, a traceability platform that makes data public to track and validate the end-to-end impact of sustainable textiles from origin to you. Powered by tracer and blockchain technologies.

Digital Product Passport (DPP)

All Iqoniq products have an Aware™ Virtual ID that gives you complete transparency and the facts of your sustainable choices. The Aware™ blockchain application is making trusted impact data public and available for final consumers with a simple scan of a QR code.

The data is directly from the makers of the products, the producers. All impact data and the complete journey of each garment are given.

Goodbye, murky claims. Hello, crystal clear impact facts!

**STANDARD
100**
2303045
Centexbel

OEKO-TEX®

OEKO-TEX® STANDARD 100 is one of the world's best-known labels for textiles tested for harmful substances.

Cutting waste used in our fabrics is not certified. That is why we have all our fabric components tested by an OEKO-TEX® authorised laboratory for harmful substances. Every Iqoniq article is OEKO-TEX® certified, harmless to human health.

Made responsibly

As part of our continuous effort to improve working conditions in the supply chain, we ensure all our Iqoniq products are manufactured in production facilities with a valid social audit according to the amfori BSCI auditing framework and Code of Conduct. This framework upholds strict social standards in line with international conventions like the Universal Declaration of Human Rights and International Labour Organisation (ILO).

Water.org

Water.org is a global non-profit organisation working to bring water and sanitation to the world. Water.org believes water is the best investment the world can make to improve health, empower women, enable access to education, increase family income and change lives. Yet, 771 million people lack access to safe water. We support water.org by donating 2% of product proceeds of each product sold from the Iqoniq collection.

Parul's family is healthy and safe

At the intersection of the water crisis and the sanitation crisis are often stories of severe illness. The consequences of using or drinking unsafe water can hardly be managed when a toilet is not present or it is overflowing with rainwater. Water.org is committed to increasing access to improved and affordable safe water and sanitation solutions for families living in poverty, like Parul's.

Prior to moving back to her hometown outside of Gazipur in Dhaka, Parul and her husband earned a living in Rajabari. Parul worked at a school and her husband had a shoe repair shop. Parul shared that, in their home, they had both running water and a toilet. When the couple lost their shoe repair business, they elected to move home, where Parul now cares for the couple's children and her parents.

"Back then we had no problems but when we came here, we faced difficulties. At this home, we have a tube well but, during the dry months it is hard to get water." Until recently, the home also lacked a proper toilet. These issues combined are why Parul believes they suffered so many health issues, including almost losing their youngest daughter.

**We support Water.org
by donating 2% of
product proceeds of
each gift sold from the
low impact collection.**

Parul, her husband, and their three daughters smile from their property in Bangladesh. Photo credit to Water.org.

Parul explained, **“When she was about one and a half years old, she had diarrhoea. I think, back then, since we faced a shortage of water, she may have eaten food without washing her hands... and that gave her diarrhoea.”** Her condition was difficult to overcome because Parul's home lacked a proper toilet and water was hard to secure. This difficult time was followed by more health and safety challenges.

“If the children needed to use the toilet at night, then either me or their father would have to go with them and stand there because it was outside and dark. And, the situation was worse when it rained. No one could even go inside the bathroom because water poured in, flooding the ground.”

Parul was familiar with financing as she and her husband financed their goats and lambs. With a loan from Water.org's local partner in Bangladesh, the couple built an improved toilet and bathroom. Their loan amount was for about \$350, and financing it has been affordable for the couple. Parul explained that with the affordable loan and improved sanitation solution they no longer face so many problems.

Now her daughters can bathe, safely use the restroom and go to school on time. Parul is thankful for organisations like Water.org who paved a way for those who, like her, know the solutions they need but they just need a little help obtaining them.

Parul and an associate of Water.org's lending partner, TMSS, discuss how life has changed for her family since financing their safe water and sanitation solutions. Photo credit to Water.org.

In depth

Recycled stainless steel

n1

Material information page

Stainless Steel is one of the best corrosion-resistant materials that can be recycled indefinitely, without losing its quality and other properties. The extended life of stainless steel makes it a prominent material in circular economy.

44%

Impact:

Recycled Stainless steel saves about 44% of GHG-emissions, compared to the products manufactured from conventional stainless steel.

Recycled content:

Post-consumer & Pre-consumer

Recyclability:

Second cycle of recycling depends on the quality and recycling method, however, stainless steel can be recycled indefinitely.

RCS certified:

The Recycled Claim Standard (RCS) verifies the percentage of recycled material and tracks it from the source to the final product.

This product contains 86% recycled stainless steel, 7% recycled PP and 5% recycled ABS.

50 mm **Printtechnique** Pad print

Maximum gift experience with minimum impact

Some insights in the decorating factory that turns all products from this collection into personalised gifts with respect for people and planet.

What is your approach to providing customers with decorating techniques?

"We are dedicated to providing our customers with a wide range of cutting-edge decorating techniques. This involves ongoing investments in state-of-the-art machinery and comprehensive training for our staff. We believe in offering all available techniques to our customers to ensure that we meet their needs and provide the best possible service."

The environmental aspect of your operations is a primary focus. Can you tell us more about that?

"We are deeply committed to making a positive impact on our activities by reducing our environmental footprint and enhancing our social and governance influence. We are guided by our core values of RESPECT, RESPONSIBILITY, and RESULTS. These principles form the pillars of our business."

How are environmental impacts of the business activities monitored?

"We closely monitor our impacts on water, soil, air, and natural resources. Our environmental policies dictate specific goals that we aim to achieve. For example, we were committed to decreasing our technological water consumption by more than 40% from 2021 to 2022., and we strive to reduce volatile organic compounds (VOCs) on an annual basis. Additionally, all recyclable waste generated in our operations is collected, properly managed, and either recycled or reused."

You ensure compliance with product certification requirements. Can you tell us more about that?

"Our product certification covers the entire journey of the final product, which often involves decoration. We take great care to ensure compliance with certification requirements for both undecorated and decorated products. We as decorating plant hold the same certifications as the products (GRS, RCS, OCS, FSC®). By choosing to decorate with us, customers safeguard the certification of their products."

That surely is a great reassurance for customers. Finally, what are emerging trends in promotional gift decoration and how to stay ahead?

"While traditional techniques like pad print and silkscreen remain successful, we continually integrate new and exciting methods. Recent trends indicate a growing demand for embroidery, transfer printing, CO₂ and laser engraving, as well as 360-round decorating. As part of our commitment to the environment, we will be implementing full solar-powered laser engraving and CO₂ engraving, ensuring these techniques have the lowest possible environmental impact."

In depth

Recycled ABS

n2

Material information page

ABS stands for Acrylonitrile Butadiene Styrene. It is a plastic that is light weight and tough. It is suitable for a variety of products and often seen in casings for audio/technology Items

80%

Impact:

Recycled ABS can reduce about 80% of CO₂-emissions, compared to the conventionally produced ABS.

Recycled content:

Post-consumer

Recyclability:

Second cycle of recycling depends on the quality and recycling method, however, it can be recycled and reused again.

RCS certified:

The Recycled Claim Standard (RCS) verifies the percentage of recycled material and tracks it from the source to the final product.

This product contains 86% recycled stainless steel, 7% recycled PP and 5% recycled ABS.

In depth

Recycled TPE

Thermoplastic elastomers (TPE) is a plastic which can be moulded under high temperatures and has a rubber-like flexibility. This means it is very suitable for products such as charging cables and watch straps.

60%

Impact:

Recycled TPE saves more than 60% of GHG-emissions, compared to the products manufactured from virgin TPE.

Recycled content:

Post-consumer.

Recyclability:

Second cycle of recycling depends on the quality and recycling method, however, it can be recycled and reused again.

03

RCS certified:

The Recycled Claim Standard (RCS) verifies the percentage of recycled material and tracks it from the source to the final product.

Ukiyo: Transforming Textiles with Our Sustainable Values

浮世ukiyō

Ukiyo is a Japanese inspired brand which promotes living a beautiful life of balance, simplicity, well-being and sustainability.

At Ukiyo, we are more than just providers of high-quality bathroom and spa textiles. Our mission goes beyond simply delivering exceptional products; we are dedicated to minimising our environmental impact and revolutionising the industry as a whole. Together, we are committed to a set of sustainable values that drive every aspect of our business.

One of the core values is **Earth**. We believe in the power of upcycling and reusing materials that would otherwise go to waste. By incorporating recycled fabrics into our towels, we reduce waste and make a positive impact on our ecological footprint. We take pride in using the Aware tracer, which guarantees the authenticity of our recycled materials.

Fire represents the transformational potential of renewable energy. We have taken a bold step by installing a large photovoltaic plant at our factory. This move harnesses the abundant energy of the sun, particularly in our location in Portugal. As a result, we have achieved a remarkable reduction of 700 tons in CO₂ emissions, exemplifying the impact clean energy alternatives can have on our planet.

Using the sun for sustainability. Reduction of 265 Ton CO₂ per year with 420 kW of photovoltaic panels for self-consumption.

Air quality is a top priority for us. In 2022, we made the courageous decision to completely eliminate the use of fossil fuels. Our factory now operates on 100% green energy, resulting in 0% CO₂ emissions. By doing so, we prioritise clean air for ourselves and future generations, setting an inspiring example for the entire industry.

Water is a precious resource, and we are dedicated to its preservation. We have made significant efforts to reduce our water consumption and are currently operating at 20% lower usage compared to European industry standards.

Moreover, our factory employs a comprehensive water treatment system to ensure that our production processes do not pollute our precious local waterways.

These sustainable values embody our commitment to creating a better future. At Ukiyo, we believe that by prioritising Earth, harnessing the power of Fire, preserving Air quality, and protecting Water resources, we can redefine the textile industry and inspire a greener world.

At Ukiyo, we are more than just providers of high-quality bathroom and spa textiles. Our mission goes beyond simply delivering exceptional products; we are dedicated to minimising our environmental impact and revolutionising the industry as a whole.

Together, let us transform textiles and pave the way for a more sustainable and environmentally conscious future. Join us on this journey, where every purchase becomes a meaningful step towards a brighter tomorrow.
